As the inaugural Editor-in-Chief of *Life Science and Technology* (LST), I take great pride in presenting our journal as a vibrant platform devoted to demystifying the intricacies of life through innovation. In a time when scientific boundaries are perpetually evolving, LST rises to promote interdisciplinary discourse, global cooperation, and the ethical stewardship of transformative discoveries.

LST will feature meticulously peer-reviewed research encompassing molecular biology, genomics, synthetic biology, biomedical engineering, biotechnology and so on. Our mission transcends mere knowledge dissemination—we aspire to ignite solutions for humanity’s most urgent dilemmas: fighting diseases, guaranteeing food security, and alleviating environmental crises. By uniting fundamental science with practical applications, we endeavor to empower researchers, policymakers, and industry pioneers alike.

To our valued contributors and readers: Your quest for knowledge propels advancement. We welcome submissions that challenge existing paradigms, harness cutting-edge technologies, or delve into the ethical considerations surrounding life science innovations.

In the years ahead, LST will spearhead initiatives like cross-institutional data-sharing collaborations aimed at addressing global-scale issues. Together, let us transmute today’s hypotheses into the realities of tomorrow.

Join us in crafting a great future where science benefits all.

Conflict of interest: The author declares no conflict of interest.
